Kari,

Ironically, I just sent you the Kansas document last night. Please let me know if you didn't receive it.

Please let me know what other materials you are looking for. My apologies but I can't recall what we discussed exactly. If it related to the cyanotoxin criteria development, I've attached a powerpoint presentation. Perhaps I also mentioned EPA's work to develop national nutrient criteria for lakes and reservoirs. See the attached ppt for more details.

Hope that helps. Feel free to jar my memory if I've forgotten anything else you were waiting on.

Tina

Tina:

Good Morning---

Just hoping to touch based and see if you would be able to send the Kansas variance information you shared with Mike and crew. Rather than chase around and find out who isn't in the field, I

thought I might connect with you. Also, during our visit you touched on a few areas of nutrient interest, if you have additional information regarding EPA's work/contracts on nutrients/variances/etc. that you could pass along that would be great.

I was nice to visit other day and hope to see you again soon

Christian,

I realized that I sent you the pdf announcing the webinar, not the actual slides. Here are the slides from the June webinar. Let me know if you have any questions.

Tina
